

# Georgia — Sovereign ESG Scorer

A defensible, comparable sovereign ESG score — composite plus per-pillar (E/S/G) breakdowns, peer ranking and trends — to feed portfolio and credit analysis.

## A score, broken into its parts

Georgia scores countries on environmental, social and governance factors, then breaks each score into its three pillars so you can see what's driving it.

- A composite ESG score per sovereign.
- Per-pillar (E / S / G) breakdowns.
- Peer ranking — how a country sits against its comparators.

ESG is now a screening requirement for many mandates; Georgia gives a clear, comparable number rather than a hand-wave.

## Trends and movers

Beyond the snapshot, Georgia shows how scores move over time and flags the notable movers across the sovereign universe — so an improving or deteriorating story is visible, not buried.

- ESG score trends over time.
- Notable movers across the universe.
- Designed to feed straight into portfolio and credit analysis.

## Open Georgia
