

Iona — Voice Briefings

A spoken two-voice briefing — the fund manager's view plus the data and analysis — on whatever country or theme you ask about, over live market data.

Two voices, one briefing

Ask a question and you get a short spoken briefing from two people: Andy Seaman as the fund manager voice, and Iona supplying the data and analysis.

- Andy gives the fund manager's perspective.
- Iona provides the numbers and the context.
- It plays back as a conversation, not a wall of text.

For clients who'd rather listen to two people talk it through than read a report, it delivers a fund manager's market view as a briefing, on demand.

Live data, and Andy's own views

The briefings run over market data refreshed through the day — Treasury rates, EM bond spreads, European yields against Bund, credit ratings and macro indicators. And Andy's written research is searchable, so you can ask what he's actually said about a country or sector.

- Live rates, spreads, ratings and macro.
- Ask about Andy's published views on a country, sector or market.

Open Iona

Iona has just appeared in your sidebar — open it there and ask for a briefing on the country or theme you're working on.
